

H3C UniServer Management Portfolio

Accelerates system management performance of business applications

Challenge

- Systems that support its applications needed to be highly available and efficient but some configurations were taking several hours to deploy
- Also, the outcomes were not always 100% accurate

Expected Outcome

- HDM: the Out-of-band management tool
- FIST: A Lite Fast intelligent Scalable toolkit for batch job
- U-center: The unified and smart management platform

Solution

- Reduced new configuration deployment times
- Frees IT staff from routine tasks
- Improves system availability to ensure the delivery of business critical applications
